

I want to register my opposition to the proposal to allow media owners to expand ownership of media outlets. Do you want to create a society with information being manipulated by a handful of media owners, such as Rupert Murdoch or Clear Channel Communications? I think we have already gone too far in letting these owners have as much opportunity to consolidate information sources as we have. NO MORE PLEASE. Let's give the American people the opportunity to have a diversified medium that will expose us to differing views. I think the media have already "sold us" out on information concerning the loss of privacy and our constitutional rights that are occurring with the present administration. We need more diversification.
